Professional Summary

Eager and talented Junior Software Developer with a strong foundation in web fullstack development, OOP and applications development. Ready to leverage my skills in user-centric software solutions.

Technical Skills

Front-end: React.js, React Native, HTML, CSS, JavaScript | **Back-end:** Node.js, Express.js | **Databases:** MongoDB | **Version Control:** Git, GitHub | Responsive Web Design | Basic DevOps and Deployment | **Languages:** C, Python, JS.

Education

B.Sc in Computer Science (expected graduation 2026)
Bar Ilan University, Ramat Gan, Israel

Full stack Development Certification (2023 – 2024)
SVCCollege, Tel Aviv, Israel

Relevant Professional Experience

Fullstack Developer, [LS Technology](#) since September 2024

I work on a production-stage application; fixing bugs and implementing new features for the application.

- I conduct QA on new features to ensure all errors are resolved before production deployment.
- I identify and fix bugs, then upload the corrected code to production.
- I work closely with experienced developers to gain hands-on experience in the full software development lifecycle

Personal Projects

Flagship Project: [Echo – a Social Media Application](#)

Developed a responsive UI with React.js, incorporated components, routes, private routes, fetch requests and various hooks to ensure functionality.

Leveraged Gen-AI to create content and designs for the final product.

Set up an Express server to handle data flow and user requests.

Utilized MongoDB for data management, employing schemas along with custom and conditional filters to optimize data storage and retrieval.
