Summary

Eager and talented, newly trained Full Stack Developer with a strong foundation in both front-end and back-end development, courtesy of a comprehensive course at SVC College in Tel-Aviv, Israel. Ready to leverage my skills in HTML5, CSS3, JavaScript, React, Node.js, and MongoDB to develop innovative, user-centric software solutions.

Technical Skills

- Front-end: React, JavaScript, HTML5, CSS3
- Back-end: Node.js, Express
- Databases: MongoDB
- Tools & Platforms: Git, Heroku
- Languages: JavaScript, Python, C#

Professional Experience

Operations Officer, 2020 – 2024 (4 yrs.)

- Led the strategic planning, coordination, and oversight of large-scale operations involving multiple organizations, ensuring successful execution.
- Designed and executed comprehensive long-term strategies and immediate-term initiatives for workforce development and training.
- Oversaw and enhanced inter-organizational communication and relationships, fostering collaboration and partnership.
- Spearheaded the development of strategic business plans by analyzing extensive datasets, identifying key insights and opportunities for growth and improvement.
- Collaborated closely with R&D teams as a key client, providing critical feedback and insights that directly influenced product enhancements and innovations, ensuring solutions met operational needs effectively.
